Sorry about the files area. . .I fixed it. . .members should be able to view and download them.

I have received some MORE backchannel reports of evidence of hacking which, interestingly enough, all involve the same perpetrators. My advice is to report these incidents to the FBI AND Yahoo! When reporting them to Yahoo! be sure to include their non-Yahoo! email addys, too.

Also, I have received reports that that disgusting STM web site has published satellite photos of our homes, ISP addresses and other identifying information that constitutes stalking. Billy Wiseman has admitted to authoring that web site. . .and Kathy Kidwell has advised a moderator that Randy Blair is assisting him. I have received reports that Blair is a computer expert. I am seeking as much information on his talents as possible.

If anyone goes to that disgusting STM web site - PLEASE run a scan on your computer BEFORE and AFTER you visit the site. SAVE the logs. You will see for yourself the miners, trackers and other intrusive programs that get planted on your computer. Also, it is possible your computer will lock up when on that site. In my opinion, that would be very dangerous. . .don't wait for it to unlock - just shut it down immediately. . .THAT'S how THIS group was hacked into - when a

moderator was HACKED and her computer froze up - her stolen ID was used to access our group and mess with our files while she tried to get her computer working again. It only took a few minutes at the MOST.

Personally, I am very disturbed about this hacking and stalking and I feel very endangered and threatened by this conduct. I want it to stop immediately. I don't think that anyone else who is the subject of similar stalking should take this too lightly. It is very clear that the authors/contributors to that disgusting STM web site do not respect the law or anyone's privacy or boundaries. The only redeeming fact is. . .it makes them look really bad.

BTW - when you say you can't find AFAC - do you mean my web site? It's up, I just checked.
